

Sow. Plant. Harvest.

A seasonal calendar for UK vegetable & herb growers

32 CROPS

Free growing guide

I Sow indoors

O Sow outdoors

P Plant / transplant

H Harvest

Read each crop from top to bottom: I, O, P, H. Marks show possible months, not one sowing cycle.

CROP			JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC	SPACING / cm	
															Rows	Plants
Aubergine	I O P H	Grow under glass													-	50-60

Beans, French	I O P H	Dwarf varieties													45	15
Beans, broad	I O P H	Autumn sowing: mild sites													45	20
Beans, runner	I O P H	Climbing varieties													60*	15-30
Beetroot	I O P H														30	10
Broccoli	I O P H	Calabrese / summer crop													45	30-45
Brussels sprouts	I O P H														60	60
Butternut squash	I O P H														90-120	90-120
Cabbage	I O P H	Summer / autumn crop													-	35-50
Carrot	I O P H														15-30	5-8
Cauliflower	I O P H	Summer / autumn varieties													60	60
Chives	I O P H	Harvest established clumps													-	23-30
Courgette	I O P H														90	90
Cucumber	I O P H	Outdoor ridge varieties													90	90
Dill	I O P H	Sow direct in small batches													30	20
Garlic	I O P H														30	15
Kale	I O P H														45	45
Leek	I O P H														30	15
Lettuce	I O P H	Spring / summer sowings													-	15-30
Onion	I O P H	Spring sets / seed													30	10
Parsley	I O P H														-	15-23
Parsnip	I O P H														30	10-15
Pea	I O P H														60-90	5-7
Pepper	I O P H	Best under glass													-	45-50
Potato	I O P H	Earlies / maincrop													60-75	30-37
Pumpkin	I O P H														100-150	100-150
Radish	I O P H														15	2.5
Spinach	I O P H	True spinach													30	7-15
Spring onion	I O P H														15	Thinly
Tomato	I O P H														75	45-60
Turnip	I O P H														23-30	10-15

Follow your conditions

These are broad UK windows. Follow the seed packet and local weather. Cold or exposed gardens start later; tender crops go outside only after the last frost. Harden off first.

Think across seasons

Winter harvests may come from the previous year's sowing. Autumn broad beans need hardy varieties and a mild site. Peppers and aubergines are best grown under glass.

Give plants room

P also means planting potato tubers, garlic cloves and onion sets. Spacings are a guide; check your variety. A dash means use the plant spacing / packet. *Runner beans: 60cm within a pair of rows; 150cm between pairs.
